

Bluefeeder®

Produced in Brazil, the feed horn **Bluefeeder®** linear single, was designed for the reception of Band C with efficiency and practicality, for professional application in reception prime focus satellite dish. Compact, lightweight, economical and high efficiency model. The feeder can be mounted on antennas with three or four rods, adapting to most models available in the market.

Model	Bluefeeder – BRBF
Polarization	Linear Single
Frequency Range	3.4 – 4.2 GHz
Rx Port	CPR 229F
F/D Range	0.30 to 0.40
VSWR	1.30:1 max.
Insertion Loss	0,20 dB
Return Loss	14 dB
Cross-polarization (Linear) on Axis	26 dB
Assembly	For primary focus antennas with 3 or 4 rods
Operating Temperature	-40°C to +60°C
Weight	0,730 Kg
Color	Blue
Painting	Electrostatic Epoxy
Accessories	Screws for LNB and scalar plate / flange protector
NCM	8529.10.90
